Developing strategic thinking in the Cyber Era is an instrumental new science of governments and policy makers. Step ahead with leaders of organizations in analyzing data in a changing world. Join us in becoming a skilled professional in one of the most critical social fields of the future.

Program highlights:

- Learn from top-notch professors and professionals in the cyber field.
- Offered to Israeli and international students, business people and executives.
- Language of instruction – English.
- Suitable for people who work during the day.
- Program length - 3 semesters (10 months) from October to August.
- Technological background is not required.

Prof. Eviatar Matania, Director of the Program and Former Director General of Israel National Cyber Directorate:

“The program builds a bridge between the technology world and the field of corporate and governmental policy and strategy, critical issues for any organization’s ability to adapt to the future world.”
